PITTSBURGH, PA.

## LA FRANCE *Everbearing* RED RASPBERRY

Double size Raspberries full of rich creamy juice, highly flavored and sweet as honey. From June till November continuously, *La France* produces this delicious fruit. Endorsed by leading horticulturists and berry growers, *La France* has also received many awards: Medals and first-class certificates by the Massachusetts Horticultural Society; Horticultural Society of New York; American Institute of Science, and other leading agricultural and horticultural bodies.

### *Best in Size, Taste and Productiveness*

Thousands of plants have been sold by the originator at more than \$1.00 each per plant. We now offer 2 year, field grown plants—plants that will produce fruit the first season planted, at

\$5.00 per 12  
\$40.00 per 100

## IVES GRAPES

*Extra Large Early Bearing Plants*  
*3 to 4 Years Old*

### Ives Grapes for Delicious Grape Juice

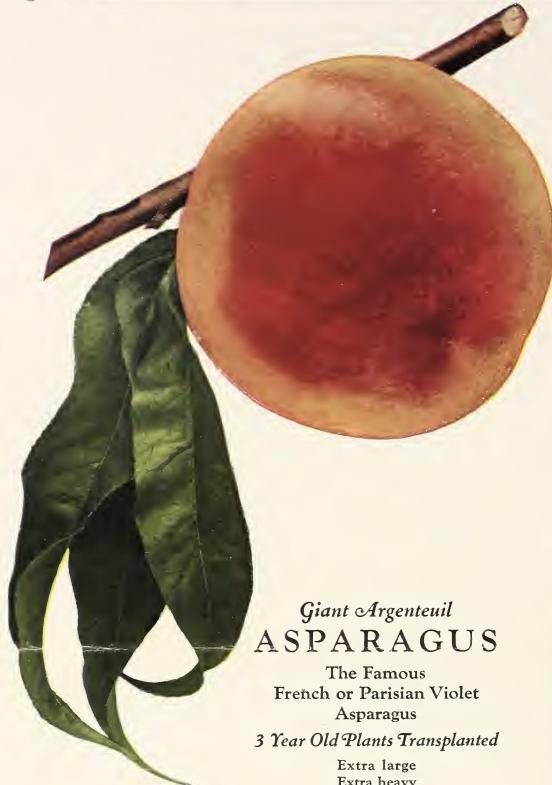

Prof. U. D. Hedrick, vice-director and horticulturist of the New York Agricultural and Experiment Station, Geneva, N. Y., says in his *Cyclopedia of Hardy Fruits* just published September, 1923, "Ives has a high reputation as a grape for making red wine and grape juice, being surpassed only by Norton, for this purpose."

Some of you may wonder why we do not offer Norton in place of Ives—Norton requires a long warm season to reach maturity so that it is seldom grown successfully north of the Potomac. Ives originated near Cincinnati, Ohio, probably from the seed of Hartford. *Color* black; *Bunch* extremely large, shouldered, compact, handsome; *Berry* large, juicy, sprightly vinous, rich, sweet without pulp; *Vine* vigorous, healthy, hardy.

If you want delicious grape juice, plant Ives; if you want quick results, plant these extra size vines. We offer strong, well rooted plants, 3 to 4 years old, strictly Glenwood grown.

\$2.00 each

3 for \$5.00 • 6 for \$9.00 • 12 for \$15.00

*Giant Argenteuil*  
**ASPARAGUS**

The Famous  
French or Parisian Violet  
Asparagus

*3 Year Old Plants Transplanted*

Extra large  
Extra heavy

Asparagus freshly cut and immediately served is one of the most delicate, wholesome, and appetizing products of the home garden. Its early appearance in the spring, together with the fact that an asparagus bed when once established will produce for many years, makes it of special importance in the home as well as in the market garden and on the truck farm. Asparagus is one of the most popular vegetables for canning, because the canned product retains the quality of the fresh shoots.

If white asparagus is desired it is necessary to cut the shoots just as they force their way through the surface of the soil, as they become green on exposure to the air. In harvesting, white shoots are cut several inches below the surface of the soil. For green asparagus the shoots are cut a little below the surface of the ground.

For the very highest quality, asparagus should be cooked within a few hours after being cut; but this, of course, is impossible *except where it is produced at home*.

The length of time an asparagus plantation will produce profitable yields depends upon the treatment it receives. A well-established bed which receives good cultivation and fertilization each year should produce profitable crops for 15 to 20 years.

This great French variety makes shoots strong enough for cutting before any other sort, stalks green tinged with purple—flavor superb.

Price \$7.00 per 100 • \$70.00 per 1000

*Anyone can grow enough Asparagus for ordinary requirements  
by following these simple directions:*

To make an asparagus bed, prepare a place of fine, loamy soil, to which has been added a liberal dressing of rich manure. Set in rows eighteen inches apart, with the plants twelve inches apart in the rows. Make a small mound of the soil, over which the roots may be spread, then cover the plants with about three inches of soil. In the fall the whole bed should be covered heavily and set in, with two or three inches of coarse stable manure, which may be lightly forked in between the rows as soon as the ground softens in the Spring. Planted as directed, 100 plants will require space 13 feet x 19½ feet.

## ROCHESTER PEACH

*Large Yellow and Red Freestone, Ripening in August*

Original orchard has produced specimens 12 inches in circumference weighing 12 ounces

It is a proved fact that our new Rochester Peach is the earliest yellow freestone, producing fruit in this section the middle of August. It is unquestionably one of the most desirable peaches yet discovered.

The tree is a strong, upright grower and very hardy, has stood 16 degrees below zero and produced a full crop, while Elberta and Crawford under the same conditions in the same orchard, were badly injured.

Flesh yellow, very highly flavored, stone small.

The daily market reports always quote Rochester as bringing a higher price per basket than any other peach.

Often Bears First Year Planted

Mr. N. D. Kemp, Dayton, Ohio, writes under date of April 14, 1922: "Two Bushel bushel of peach pips of last spring are fully developed and will be ready for market in 1923." Mr. C. A. Hunt, Fort Wayne, Indiana, writes: "I took a photograph taken May 19, 1922, of a tree purchased from us and planted in May, 1921. This photograph shows 24 Peaches on a single tree developing at that time, one year after transplanting."

Mr. C. E. Strawbridge, Lima, Ohio, writes under date of August 26, 1920: "On April 14, 1920, I planted 100 peach pips in 100 10 ft. by 10 ft. Peach Trees. This year we have picked exactly 403 large Peaches from this one tree."

*For Spring planting, fine medium size trees*

3 to 4 ft., \$1.00 each; \$10.00 per dozen  
Larger size trees, 4 to 6 ft., \$1.50 each; \$15.00 per dozen

## SUPER-SIZE FRUIT TREES

*Extra large • Extra old • Extra fine*

Trees 7 to 9 feet tall

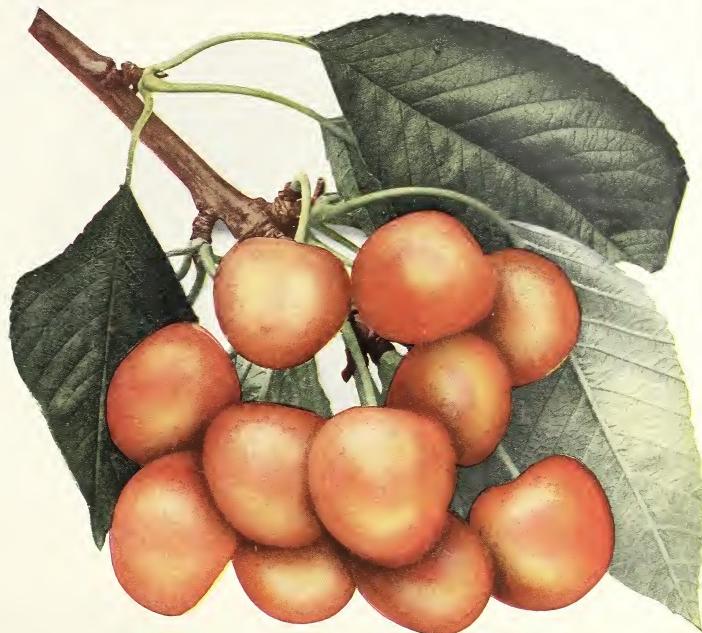

Well branched tops

Splendid roots

Inquiries for older and larger fruit trees than those usually offered by nurseriesmen, are becoming more numerous each year. These inquiries make it evident that many people prefer older and larger trees for quicker results. Hence, to supply this increasing demand, we have started the growing of SUPER-SIZE FRUIT TREES.

Under date of October 16th, Mr. C. R. Rinchart, 250 West 54th St., New York City, wrote a former nurseryman now residing in Rochester, and who for business reasons does not want his name mentioned, as follows: "Since writing you, I have written to a couple of nurseries in Dansville, and one in Geneva and it looks as though I was not going to be able to get an Apple Tree much in excess of two years. I am disappointed in this as I would like to get it as far along as possible."

Mr. Rinchart received a reply as follows: "You say you want trees older than two years and find them hard to locate. I happened to visit the nurseries of Glen Brothers, Rochester, the other day, where I saw a very handsome block of older fruit trees, including some handsome Apples."

*To those of our customers who desire such trees, we offer the following assortment:*

**APPLES**  
YELLOW TRANSPARENT  
MAIDEN BLUSH  
OLDBURG  
TWENTY OUNCE

DELICIOUS  
MCINTOSH  
NORTHERN SPY  
WEALTHY

BARTLETT

BURLBANK  
WICKSON

CHERRIES  
DIKEMAN  
NAPOLEON  
TARTARIAN  
GOVERNOR WOOD

\$3.00 each • \$30.00 per dozen

*A typical letter received from the purchasers of  
"GLENWOOD GROWN" TREES*

WILLIAMSPORT, IND.

March 15, 1922.

GLEN BROS. NURSERY,  
Rochester, N. Y.

Gentlemen:—

Some time ago the County Commissioners of this County decided they would like to experiment with an orchard. After this decision was made, they approached me to supply them with stock. I called on Mr. Madus, and he in turn solicited the aid of Purdue University. Now Mr. Madus, knowing I had carried on some experiments in fruit raising, approached me again to the nursery stock. I gave him your address and advised him to go to you, knowing your prices might be better quality. Ten Nurseries have submitted prices, yours among them, and I am sure you will be the best buy. I have given you my name and some little time to convince them that your prices were on unquestionable stock while the other prices were quoted in such a manner it would be possible for them to ship in a hasty manner and not care about their trees. To further demonstrate the quality of your stock, I took them to my grounds where I showed them every tree, shrub and flower which I purchased from you and no stock from other nurseries. The superiority of your stock over theirs is beyond question. I hope your stock will prove up to their expectations. This orchard will be extended from year to year and naturally, if your stock proves out, they will go on your books as the best buy.

I have never lost a tree or shrub purchased from you.

Very truly yours,

(Signed) A. R. MCKINNEY.

## LUSCIOUS BLUEBERRIES

*Delicious Three Times a Day  
One Never Tires of Them*

With Sugar and Cream for Breakfast  
Blueberry Dumplings for Luncheon  
Blueberry Pie for Dinner

The annual Blueberry crop sells for millions of dollars, yet there are comparatively few people who have ever tried growing Blueberries in their gardens.

*Try a Dozen of our Large Bushy Plants  
This Spring — Fruiting Season  
Early July till Late Summer*

Nor should the ornamental value of Blueberries be overlooked. Prof. Bailey says:

"In the spring the young shoots and leaves are a rich fiery red, later clusters of small, white flowers follow, and in autumn clusters of bright red berries. In winter the red bark creates a charming tracing of red twigs against the snow. Rarely does a plant or shrub combine such exquisite beauty with a fruit than which there is none more delectable. It is a valuable addition to the garden for fruit and as an ornamental shrub. It thrives in the garden and is readily susceptible to improvement by cultivation."

*Strong, bushy plants, 2 to 3 feet  
balled and burlapped*

Price \$2.00 each • \$20.00 per dozen

## THE LOGANBERRY

*A Raspberry - Blackberry*

Berries often  $1\frac{1}{4}$  inches long

Unexcelled for table use, jam, jell, canning and drying—quite tart unless very ripe—requires winter protection in the East and middle states.

The vine is a strong grower; berry, red in color, and ripens before Raspberries and Blackberries are plentiful. We offer for Spring shipment, strong, 2 year old plants grown at Glenwood Nursery, Fairport, N. Y. These plants received but slight protection from the cold last winter, being covered lightly with coarse straw yet suffered no injury from the cold and produced considerable fruit last summer. A photographic reproduction of this field taken in August last, appears on page 9 of our general catalogue.

6 plants for \$3.50  
12 plants for \$6.00  
100 plants for \$45.00

## SUPERB Everbearing STRAWBERRY

### *The Early till Late Strawberry*

The universal favorite; berries large, perfectly formed, beautifully colored, deliciously flavored. Hardy in plant, in blossom and in fruit. Luscious berries on your table four months in the year, June, July, August and September.

A well-known authority on Strawberry cultivation states "You simply can't keep them from fruiting from June until November unless you pick the blossoms." They are the most persistent plants in their fruiting habits I have ever known.

Many cases of Superb Berries shipped more than a thousand miles arrived in good condition and brought high prices.

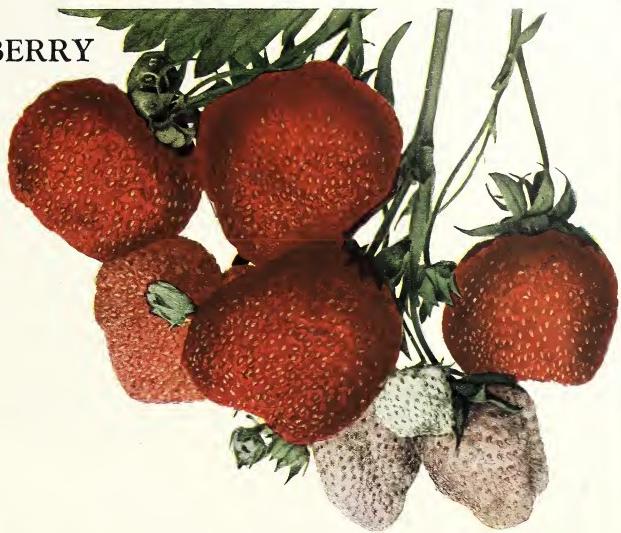

Best for Market and Best for Home, because they afford good picking a week before the early varieties of the old kinds, and do not exhaust the vitality of the plant. Hardy from Maine to California; from Hudson Bay to Florida.

A Strawberry bed for everyone everywhere. Delicious berries on the table four months in the year from a square rod ( $10\frac{1}{2}$  ft. square), is within the reach of almost everyone, even the city resident. We know of no better everbearing Strawberry grown than *Superb*.

#### *Strong, field-grown plants*

\$1.00 per dozen

\$5.00 per 100    \$40.00 per 1000

## BURBANK'S THORNLESS BLACKBERRY

### *Something Entirely Different*

Introduced by Luther Burbank

*Burbank's Thornless Blackberry* is all and more than anyone has claimed for it. We candidly believe that in the near future the majority of blackberries grown both for home use and for shipping, will be of the thornless sort. The fruit is as easy to gather as grapes, neither gloves nor courage needed. One can gather them readily, getting every berry, and not getting scratched by the vine.

*Burbank's Thornless Blackberry* is an immense bearer after the second year. Fruit good size, jet black, finest of flavor. Never before has history recorded a commercially valuable thornless blackberry. They have come to stay and take their place amongst fruits. We offer it again this season and can make prompt shipment throughout the planting season of Spring 1933.

#### *Strong, well rooted plants*

6 for \$3.00

12 for \$5.00

100 for \$40.00

### All Season Dwarf PEAR COLLECTION

Six choice varieties for \$5.00

Regular size trees only

Koonee . . . . .	July
Wilder Early . . . . .	Early August
Clapp's Favorite . . . . .	Late August

1 Northern Spy . . . . .	January to April
1 Winesap . . . . .	January to June

Price for these six trees in this special size  
\$10.00

### HARDY ENGLISH WALNUT TREES (ROCHESTER GROWN)

Try growing a few hardy English Walnut Trees this Spring. Plant them about the house and other buildings, along the walks and drives, along boundary lines and road sides—exquisitely beautiful with their smooth, light gray bark, luxuriant dark green foliage, lots of sweet growth.

Plant them for their beauty and the nuts they bear

Glenwood-grown English Walnut Trees are hardy—we are sure

Trees 5 to 6 feet, \$5.00 each; \$50.00 per 12

Trees 6 to 8 feet, \$10.00 each, \$100.00 per 12

### Burbank's Giant Crimson RHUBARB

Rhubarb—Pie Plant—whatever you wish to call it, there is nothing like it for pie and sauce—it's healthful, too.

Plant this Spring  
Ready to use in thirty days

Extra large, of fine bloom, and crimson color, this new variety of appetizing "pie-plant" should be in every garden and will be when known. Plant a few this spring along beside that you now have growing in your garden and note the difference. *Burbank's Giant Crimson* is superior in size and quality to any variety we have ever tested. It is an early variety, without being in the least tough or stringy, with a mild sub-acid flavor. Largest and best of all for market or home use.

Plant this spring in good garden soil, manure well, and have delicious pie and sauce all summer.

Price for strong roots  
50c each • \$3.00 per dozen

*"The Tints of the Dawn—the Gold  
of Noonday—the Blush of Sunset"*

See general catalogue  
pages 11, 12 and 13

## LOS ANGELES ROSE

*An American Hybrid Tea of Unusual Merit*

Its magnificent color shades combined with its delightful fragrance and its continuous blooming season, make it one of the finest roses ever produced. We procured our parent plants of this magnificent rose, from Howard & Smith, introducers, in 1917. We found the growth very vigorous, producing a continuous succession of long stemmed flowers of a luminous flame-pink, toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Neil. The buds are long and pointed and expand into a flower of mammoth proportion, while the beauty of form and ever increasing wealth of color is maintained from the incipient bud until the last petal drops. *It never disappoints.*

*We offer strong, field grown plants, well rooted,  
guaranteed to bloom the first season*

\$2.50 each • \$25.00 per 12

## A big surprise box of EVERGREENS

*A happy surprise for those who buy it*

Six Fine Plants • All Different • For \$10.00

*This special assortment consists of*

1 AUSTRIAN PINE $\frac{3}{4}$ FEET	1 AMERICAN ARBORVITAE $\frac{2}{3}$ FEET
1 NORWAY SPRUCE $\frac{3}{4}$ FEET	1 BALSAM FIR $\frac{2}{3}$ FEET
1 AMERICAN HEMLOCK $\frac{3}{4}$ FEET	1 HOVEY'S GOLDEN ARBORVITAE 2 FEET

All strictly "Glenwood Grown" All Balled and Burlapped

*At regular prices this assortment  
would cost \$14.75 and it's worth it*

These plants are taken from regular stock and all just as pictured, each is first class in quality and of the size specified and each plant properly labeled according to variety. Only the sale of a large number of these assortments could make it possible for us to offer it at this low price. Order early as this offer will positively be withdrawn at the close of the Spring planting season.

*The Price Now is Only  
\$10.00*

# SIX BEAUTIFUL LILACS

Plant More Lilacs But Plant the Right Varieties

## Special Offer

Here are six that have attracted a wonderful lot of attention at Highland Park, Rochester, N.Y. Thousands come from far and near to witness this exquisite Lilac Show on Lilac Day each Spring. Here one sees a solid mass of bloom, delightfully fragrant. We grow and offer only such varieties as are found in this famous collection. A group planting of the following six varieties on the lawn is a beautiful sight when in bloom—all should bloom this season.

CHARLES JOLY: The opening flowers are of a deep wine red and change to a light purple red. One of the best double, dark flowering lilacs.

COMTE DE KERCHOVE: Large compact panicles; color, ashy rose.

MADAM ABEL CHATENEY: Milk white with compact clusters; very distinct.

MICHAEL BUCHNER: Clear lilac, very large clusters, free flowering; makes a very compact bush.

LA TOUR D'AUVERGNE: Purple violet.

SENATEUR VOLLAND: Fushia red, a beautiful lilac—free bloomer. Our plants are strong and bushy, 3 to 4 ft. high, exceptionally well-rooted.

We offer this collection of six plants for \$10.00

Single plants \$2.00 each

## GLEN BROTHERS-GLENWOOD NURSERY

### A WONDERFUL FLOWER GARDEN

"Say it with Flowers"

#### Twenty-four Choice Perennial Plants

All Sizes — All Colors

4 plants CAMPANULA PIRAMIDALIS (Chinese Bellflower) very conspicuous, forming a perfect pyramid; 4 to 6 feet high, covered with porcelain blue flowers—August.

4 plants ANEMONE QUEEN CHARLOTTE (Japanese Windflower) very large semi-double flower of La France pink, blooming in August and September; grows 2 to 3 feet high—excellent for cutting.

4 plants of hardy PHLOX, assorted colors. The great showy heads of bloom are produced in gorgeous profusion from midsummer until checked by frost. Grows 2 feet tall.

4 plants DELPHINIUM BELLADONNA (Hairy Larkspur) the clear turquoise blue of this flower is not equalled for delicacy and beauty by any other flower—blooms from June to October, never being out of flower during its blooming season—4 feet.

4 plants GYPSOPHILA PANICULATA (Baby's Breath) Bloom during July and August, forming a symmetrical mass 2 to 3 feet in height—beautiful white flowers.

4 plants LOBELIA CARDINALIS (Cardinal Flower) from early August until late September, a mass of rich fiery cardinal flower spikes; 24 to 30 inches long—grows 3 feet tall.

If you love flowers and lots of them and want them continuously all summer, this splendid collection of 24 plants will prove to be all that one could possibly anticipate. We offer extra strong plants, to bloom this summer.

Price \$7.00  
for entire collection

Continuous Bloom from June Until Frost
